

About Us

Persian Marble Company has been one of the leading companies in production and export of Iranian stones, since 1987. We own a marble factory and an Ivory beige marble quarry *Crema Persia*.

In our factory, we produce Crema Persia, Persiano Limestone, Travertine and Onyx in the forms of slabs, standard size, cut-to-size and, calibrated tiles. We process regular finishing: polished, honed and brushed. Our production has been exported to over 50 countries around the world.

Having direct access to superior Crema Persia and other Iranian blocks, as well as using the most sophisticated processing lines, has enabled us to hit a higher standard, on Iranian stones, in terms of quality and color.

Quarry

Persian Marble Company has her own *Crema Persia* marble quarry in Dehbid area, Fars province (less than 2:30 hours from Shiraz airport). The color has two basic backgrounds of Ivory or beige. The beige ranges from light to dark beige, and the Ivory starts from almost plain to Brescia patterns. The perfect structural composition of the blocks provides uniform appearance when sawn in any direction (no cross cut or vein cut). Additionally, *Crema Persia* is structurally compact to provide any cut-to-size, as large as you can possibly manage to fix.

Stock Yard

Our stock yard is located in Dehbid industrial zone, where we stock the produced blocks.

Block yard in Dehbid

Crema Persia Quarry

Factory

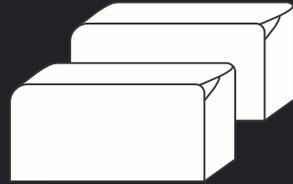

The factory is located in Tehran Shams-Abad industrial zone, 30 km south of Tehran, ten minutes away from Tehran IKIA international airport.

Built up on 30.000 m² of industrial land, with 8000 m² of workshops and offices, Persian Marble is the most professional marble factory in Iran, producing slabs, cut-to-size, standard size and calibrated tiles.

Production Chart

Persian Marble

Block

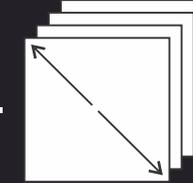

Capacity: 5000 tons/month
Block yard: located at Dehbid
Usage: Interior only

Physical Characteristics

- | | |
|----------------------------------|-------------------------|
| • Saturated Compressive Strength | 282 kg/cm ² |
| • Dry Compressive Strength | 373 kg/cm ² |
| • Saturated Density | 2.68 gr/cm ³ |
| • Dry Density | 2.67 gr/cm ³ |
| • Apparently Density | 2.70 gr/cm ³ |
| • Water Absorbtion | 0.31 % |
| • Porosity | 0.84 % |

Slab

Capacity: 1000 m²/ day
Machinery: 6 BM Gang saws
16+8 Simec polishing line
Thickness: 20 mm and 30 mm
Material: Marble, Onyx, Limestone and Travertine

Standard Size

Capacity: 600 m²/ Day
Machinery: Simec
Main sizes: 160x160, 140x140, 120x120 , 100x100, 80x80 cm
Secondary sizes: 60x60, 60x40 , 60x30, 80x40 cm
Thickness: 20 mm and 30 mm
Material: crema persia and gohara limestone

Calibrated Tile

Capacity: 600 m² / Day
Machinery: Full Automatic simec
Maximum Size: 610x610 mm
Minimum Thickness: 10 mm
Material: Persiano Limestone only

Standard Size

We produce following standard sizes on Crema Persia:
First priority: 160x160, 140x140, 120x120, 80x80 cm
Second priority: 100x100, 60x60, 60x40 cm

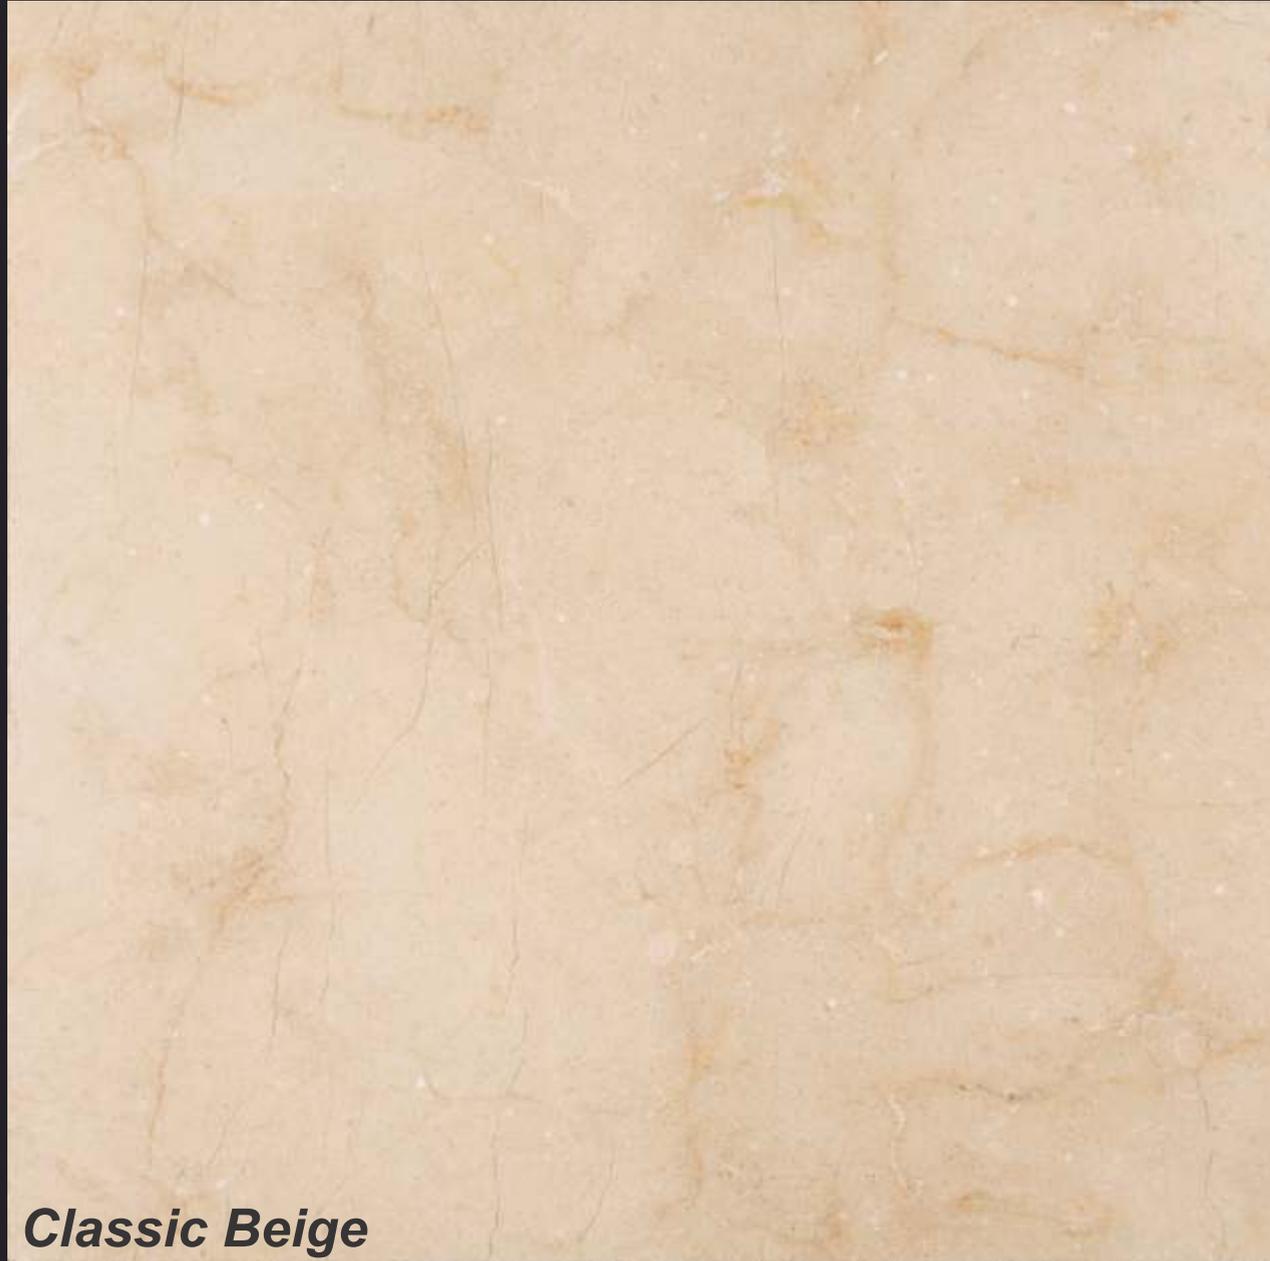

Slab and Cut-to-Size

Relying on our own Crema Persia marble quarry, we undertake big projects of standard size and cut to size. We also produce 2 and 3 Slabs of all other Iranian travertine, marble, onyx, and limestone.
